Summary

Full Stack Developer with 2+ year of hands-on experience in developing ERP systems, e-commerce platforms, and responsive web applications using React.js, Angular, and Next.js. Experienced in optimizing ERP components for performance and data integrity, building secure REST APIs, and managing seamless backend–frontend data flow. Skilled in creating responsive, user-focused interfaces and delivering technology-driven solutions for business and social initiatives.

Experience

Exouzia

Dec 2023 - Present

Frontend Developer

- Built and maintained ERP and e-commerce web applications using React.js, Angular, and Next.js, focusing on scalability, performance, and clean UI architecture.
- Designed and implemented fully responsive websites optimized for multiple devices and browsers, ensuring consistent user experience.
- Developed and modernized ERP modules (sales, billing, inventory, reporting) by enhancing components based on client requirements and business logic.
- Integrated frontend applications with backend services using REST APIs, enabling smooth data flow and real-time updates across systems.
- Applied efficient state management and reusable component patterns to improve maintainability and performance of large-scale applications.

Luminar Technolab

May 2023 - Nov 2023

MEARN Stack Developer Intern

- United with a team to develop web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) and Angular for select projects. Created user-friendly and responsive web pages using React.js
- Incorporated front-end and back-end systems by connecting APIs for seamless functionality.
- Utilized MongoDB to store and manage data across various projects.
- Identified and fixed bugs, improving application performance and efficiency.
- Used Git for version control and worked effectively with team members on shared codebases.

Technical Skills

Frontend: React.js, Next.js, Angular, Redux Toolkit, Bootstrap, JavaScript, TypeScript, HTML5, Tailwind, SCSS, Figma

Backend: Node.js, Express.js, RESTful APIs, Web Sockets, Microservices, JSON

Database: SQL, PostgreSQL, MySQL, MongoDB

DevOps And Tools: Postman, GitLab, Git, Swagger

Soft Skills: Problem-solving, Communication, Teamwork and Cooperation, Time Management, Critical Thinking

Education

Lement College of Advanced Studies, Palakkad

2020 - 2023

- Bachelor of Science in Computer Science

Projects

Axent ERP System

- Developed an ERP system covering sales, inventory, HR, and accounting modules.
- Designed simple and responsive user interfaces to ensure a seamless experience across the ERP platform.
- Implemented secure POST APIs to safely handle and protect sensitive business and user data, including financial and employee records.
- Collaborated with backend developers to merge RESTful APIs, manage real-time data updates, and maintain consistent UI across modules.

E-commerce website

- Developed a responsive e-commerce website featuring product listing, search, cart, and order placement functionality.
- Implemented user authentication and role-based access for customers and admins to manage products and orders.
- Integrated backend APIs to handle product management, cart operations, and order tracking efficiently.

Billing S/W

- ERP project focused on billing and sales report management
- Revised and improved components based on client requirements using advanced array methods
- Managed purchase orders and order summaries with a focus on performance and accuracy

Room Booking ERP

- expanded and sustained a complete ERP system using Angular and Prime NG, ensuring responsive design and modular architecture.
- Modernized multiple components to align with client requirements
- blended secure authentication features to ensure access protection

Seosko Serv Private Limited

- Experienced in providing comprehensive business support services, including exporting consultancy, IT solutions, project management, and training.
- Proven ability to develop strategic partnerships to enhance business growth and streamline operational processes.
- Adept at managing cross-functional teams, delivering client-focused IT solutions, and providing training to support organizational objectives.

Skyrockets

- Skyrockets offers end-to-end services including branding, digital marketing, advertising, web and mobile app development, market research, and CRM/ERP solutions. These services are designed to build a strong brand presence, enhance user experience, and drive business growth.
- From market analysis and regulatory compliance to sales training and customer engagement, Skyrockets provides strategic consulting and execution tailored to help businesses grow, stay competitive, and build lasting customer relationships.
